

Reference No. 6.27

INDUSTRIAL DISPUTES, NOVEMBER 1975

MAIN FEATURES

- In November 1975 there were 182 industrial disputes involving 322,300 employees and resulting in a loss of 270,100 working days.
- There were stoppages in all States during the political crisis and these resulted in about 152,000 working days being lost. This figure represents 56 per cent of all working days lost in the month.
- Other major disputes during the month affected bauxite mining in Queensland and meat works in Victoria.

EXPLANATORY NOTES

This bulletin contains statistics of industrial disputes for the month of November 1975 and some previous periods. More information about these disputes will appear later in the detailed quarterly bulletin *Industrial Disputes* (Reference No. 6.6).

2. The statistics of industrial disputes are compiled according to the Australian Standard Industrial Classification (ASIC), described in the Bureau publication *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Vol. 1. Statistics on this basis are published in *Labour Report* No. 58, 1973 (Reference No. 6.7).

3. The statistics of industrial disputes refer only to disputes involving stoppages of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly

involved are employees thrown out of work at the establishments where the stoppages occurred, but not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may be estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

4. Stoppages of work occurring at different times and at different establishments, but due to the same cause may be regarded as one industrial dispute. However, an industrial dispute occurring in more than one State is counted as a separate dispute in each State. A dispute involving workers in more than one industry in a State or Territory is counted only once in the number of disputes — in the industry that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industries. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes. Average days lost per worker involved on a monthly basis are not comparable with the yearly averages, because workers involved are included in each month in which they are involved in disputes, while they are counted once only for each dispute in the annual figures. Any discrepancies between totals and sums of components are due to rounding.

5. For statistics of industrial disputes for earlier periods see *Labour Report* No. 58, 1973 (Reference No. 6.7).

TABLE 1. - INDUSTRIAL DISPUTES : AUSTRALIA

Period	Number of disputes		Workers involved ('000)		Working days lost		Estimated loss in wages (a) (\$'000)
	Beginning in month	Total (a)	Beginning in month	Total (a)	Number (a) ('000)	Average days per worker involved (b)
